

Transpak POWERED TROLLEY

The Electrodrive Transpak makes light work of meal deliveries, providing a power drive to overcome the push effort. Manoeuvring is easy with its tiller style control, and visibility is vastly improved as the trolley is positioned behind the operator, keeping them in front of the load.

Meal deliveries in hospitals and aged care facilities is a demanding task. Pushing and manoeuvring refrigerated and heated tray delivery units presents serious risks of manual handling injuries, like back and side strains, while obscured vision increases the risk of accidents and collisions.

The Transpak can motorise your existing manual trolley or move heavy loads up and down ramps, over carpet and in-and-out of lifts.

The Transpak is completely customisable to suit any meal delivery system.

Typical applications

Suitable for hospitals, hotels, nursing homes and function centres.

Features

Tow capacity	500 kg
Max. speed	Up to 4 km/hour
Speed mode	Three speed control with forward, reverse and emergency stop.
Usability	<ul style="list-style-type: none">• No driver's licence required.• Simple to use.• Quiet, smooth operation.• Zero emissions.
Compatibility	<ul style="list-style-type: none">• Compatible with all meal delivery systems including those from Burlodge, Socamel and Versigen.• Frame size can be built to suit your requirements.
Dimensions (L/W/H)	1980/700/860 mm (handle down)
Battery	Two 12V 26Ah MK-gel batteries with 24V smart charger

Safety features

- Intuitive control with standard automatic safety brake, forward and reverse drive.
- Emergency stop button.
- Emergency back-off button.
