

Tug Tough 20T POWERED TUG

The perfect heavy duty workhorse for loads up to 20 tonnes, the Tug Tough utilises a powerful 48 V drive system to allow a single operator to hitch to and move big loads.

The Tug Tough can be fitted with an optional hydraulic lifting hitch available for either capacity.

It allows the operator to walk in front of the heavy load, allowing maximum forward vision and eliminating the possibility of accidents when negotiating turns.

Ideal for moving very heavy wheeled loads and equipment, heavy duty construction, vehicles and aircraft.

See page 25 for hitch options.

Typical applications

Suitable for airports, mining, factories, railways.

Features
