

Follow-Me trolley

Typical applications

Suitable for retail or industrial environments, including supermarkets where shoppers are pushing trolleys around aisles and passages.

Features

Usability	<ul style="list-style-type: none">• High manoeuvrability of trolley trains through tight corners and S-bends.• Stay in 'front of load', preventing push-pull injuries and the risk of collisions with pedestrians or objects.• Suitable for retail or industrial environments, including supermarkets where shoppers are pushing trolleys around aisles and passages.• Can be ordered separately or with the Tug Compact.• Articulation system can be retrofitted to your existing fleet of trolleys.• Made to order.
Hitching	Quick release levers for easy hitching and unhitching.
Dimensions (L/W/H)	Standard size: 819/411/943 mm

Custom sizes available

Can also be customised to suit any application. The articulation system can even be retrofitted to your existing fleet of trolleys.

The Follow-Me Trolley is a highly manoeuvrable flatbed trolley with an articulation system inspired by B-Double trailers and road trains.

Designed with a quick hitching mechanism, each trolley can be easily hitched into a train where it mimics the movement of the object directly in front, giving the whole train a very tight turn circle and allowing it to negotiate tight corners and S-bends.

Combined with an Electrodrive powered tug, up to 10 fully loaded Follow-Me Trolleys can be towed safely by one person through tight shopping aisles.

Designed for the smallest tug in our range, the Tug Compact (with its width of only 609 mm) allows it to comfortably fit through doorways and corridors.
