

Gzunda GZS BED MOVER

The Gzunda GZS hospital bed mover allows one person to effortlessly move heavy hospital beds. The motorised unit operates equally well with or without a patient, simplifying the task of moving beds or patients between wards, departments, or to and from theatre, allowing the driver to focus on the needs of the patient during transport.

With a capacity of 600 kg, the silent motorised unit is able to move a hospital bed up or down ramps, over carpet, into lifts, and around tight corners with minimal effort by the operator. The GZS has easy-to-use controls, including key start, twist grip variable speed control, horn, and emergency stop button. As with all Electrodrive equipment, the GZ10SL comes with a comprehensive 12-month warranty, including parts and labour.

Typical applications

Suitable for moving hospital beds. No under-bed clearance is required.

Features

Load capacity	Move up to 600 kg at 6° incline
